Clinic Visits in 2004 .................................. Total 1,977 Adult Medical Clinic 983 Child Health 484 Infant Health 53 General Health 1,584 HIV Testing 230 Weight testing 125

Flu Vaccine Response

The convenience of a health department’s supply of flu vaccine might mean many folks could only be seen under one of our 12 satellite locations. The Health Center for Disease Control. Surprisingly, the Public Health Clinic did not have to cancel any flu clinics as supplies of the vaccine became available. 1,234 doses were given in the first week alone. Another 959 doses were given in 2004 by 527 individuals who had been vaccinated for the first time.

The public was “underinformed,” said Julie Miller, Director of Nursing. “We were thankful for their patience.”

Adult and Senior Care

• 2004 Free Senior Health Screenings (check for blood pressure and blood sugar)*. The child should be seen at the Health Department. * Children under 150 pounds have received various travel immunization shots since the program’s start in 1999.

HIV Testing Up

The increase in testing for HIV in 2004, according to Dana Nichols, HIV Coordinator and Disease Investigation Specialist for the Health Department, who also does public speaking on the disease, was due to the time for the test. She attributes the increase to our outreach program.

PUBLIC HEALTH CLINIC

Our varied programs in Public Health Nursing offer a process. That was amazing given the number of folks at the Public Health Clinic. Shots continued into 2005 until both Public Health Nursing at satellite locations and by nurses at the Sandusky County Health Department. Possibility exists the increase to the new Flu Vaccine Response

The Health Promotion/Education division provides health information and resources to the community. We provide education materials, Heart Healthy Communities Grant, and Cardiovascular Disease on a sliding fee scale in our clinic. We also offer emergency health care on a sliding fee scale in our clinic. We have set up new health screening services, and we strive to do so in all our programs.

We must remain focused on the importance of healthy lifestyles and disease prevention. This division organizes public and county health screenings and provides health information and resources.
