Winter Safety Tips

It’s the most wonderful time of the year. Unless you have to work, drive, or walk in that winter stuff. But even if you love winter weather and playing in the snow, there are some precautions you should take to make sure you and others stay safe and healthy during the winter months. Richland Public Health has prepared an extensive list of Winter Safety Tips. They are available on our website at richlandhealth.org or by calling 419-774-4726.

The Winter Safety Tips have been gathered from a number of agencies including Ready Nation, Centers for Disease Control and Prevention, Ohio Emergency Management Authority, Ohio Department of Public Safety, Prevention Magazine, and the National Safety Council. Among the topics covered are Preparing for Winter Storms; Indoor (home) and Outdoor Safety; Hypothermia Dangers; Frostbite; Walking Workouts in Winter Weather; Winter Pedestrian Safety; and Driving in Winter Weather.

Richland Public Health is proud to have been designated a Weather Ready Nation Ambassador by the National Oceanic and Atmospheric Administration. Be prepared and stay safe.

Stay Healthy - Wash Your Hands

Richland Public Health urges everyone to get a flu shot during the month of December (by walk-in or Clinic appointment: 419-774-4700), but what other ways can you help keep healthy?

Believe it or not, scientists estimate that people are not washing their hands often or well enough and may transmit up to 80% of all infections by their hands.

From doorknobs to animals to food, harmful germs can live on almost everything. Frequent handwashing may be your single most important act to help stop the spread of infection and stay healthy. HERE’S HOW (according to the Centers for Disease Control and Prevention):

1. Wet your hands under clean running water, turn off the tap, apply soap.
2. Lather your hands by rubbing them together with the soap. Lather the back of your hands, between your fingers, and under your nails.
3. Scrub your hands for 20 seconds. Need a timer? Hum the “Happy Birthday” song from beginning to end twice.
4. Rinse hands well under clean, running water.
5. Dry hands using clean towel or air dry them.

Flu Shots Still Important

If you haven’t gotten a flu shot yet, there is still time. Here’s some enlightening information from the Centers for Disease Control and Prevention that might help you make up your mind:

- Annual epidemics of seasonal influenza typically occur in the United States between October and April.
- Persons of all age groups are susceptible to influenza.
- The highest rates of outpatient visits for influenza occurred among children aged 2 through 17 years.
- Complications, hospitalizations, and deaths from seasonal influenza are greatest among persons aged greater that 65 years, children aged less than 2 years, and persons of any age who have medical conditions that could increase risk for complications from influenza.
- Richland County has had 794 flu cases and 84 hospitalizations from complications of the flu from January through October, 2019.

No one wants to be sick during the holidays. Call 419-774-4700 to schedule your seasonal flu shot at a time convenient for you.

National Health Observances for December: International AIDS Awareness Month; National Drunk and Drugged Driver Prevention Month; Safe: Toy Buying Month; December 1-7: National Handwashing Awareness Week; December 1-7: National Influenza Vaccination Week.

Toy Safety Buying Tips

Christmas is a time especially for children, and for children this means toys. Each year, more than 3 billion toys and games are sold in the United States with 65 percent of these sales occurring between Thanksgiving and the day before Christmas. Although toys are fun and educational, they can be dangerous. Poorly designed and constructed toys, or toys that are inappropriate for your child’s level of development can cause serious injury, and in some cases, death.

Richland Public Health and Safe Kids USA offer the following tips and suggestions:

- If there is an age warning, stick to the recommendation. Do not buy “older” toys for young children.
- Remember that young children may be especially vulnerable to choking on small parts and toys containing these should be avoided when buying for this group.
- There are various things you can check on the toy:
  - sharp edges or hidden spikes
  - loose facial features, wheels, tires and other small parts: These should be securely fixed to the toy
  - secure seams: if the stuffing accessible, a child could choke on it
  - any cord on a pull along toy should be at least 1.5 mm thick
  - any holes or gaps into which children could put their fingers and suffer harm from the mechanical parts inside
  - brittle plastic which could shatter into small sharp pieces
  - folding mechanisms: How much damage would they do if a child's finger were caught in them?

Richland Public Health cautions that items with painted surfaces may contain lead paint. Consumers should sign up to receive products recalls with the Consumer Product Safety Commission (www.cpsc.gov). For questions or concerns about lead paint in toys, call Environmental Health at Richland Public Health, 419-774-4520.

Holiday Hours in December

On Wednesday, December 4, the Clinic and WIC will be open from 8:00 a.m. to 4:30 p.m.

The Wednesday late clinic hours (9:30 a.m. to 6 p.m.) and WIC hours (10 a.m. to 6:30 p.m.) will resume on December 11 and December 18.

Richland Public Health will be closed at 11:30 a.m. on Tuesday, December 24 and all day December 25 for the Christmas holiday.

“Calm mind brings inner strength and self-confidence, so that’s very important for good health.”
